

## Bespoke laboratory organization

The SmartRack® creates the optimal working environment for your laboratory, because the SmartRack® is the first and world's only modular organization system for laboratory workstations in which a wide variety of laboratory accessories can be stored.

It enables user efficient one-handed operation, creates order as well as free space for working and therefore improves workstation safety. The modular design of the SmartRack® means it can be adapted to different activities and different needs of its users.

ORGANIZATION

SPACE-SAVING

EFFICIENCY

SAFETY

## Why the SmartRack® also has a place in your laboratory

Whether you need general basic equipment for your laboratory or special experimental set-ups for analytics, the SmartRack® is your first choice. It increases efficiency and improves occupational safety by improving the organization of workstations and creating free work space. It also actively supports the health of your employees and saves costs by avoiding laboratory accidents, sample mix-ups and sample loss.

Better Basics defines five areas for the SmartRack® to optimize laboratory work in the 21<sup>st</sup> century

### Organization – more organization at laboratory workstations

**Do you need a secure holder for microliter syringes, a storage option for screw top bottles or a way to temporarily store sample containers and all that in a tight space?**

Transportable and scalable, the SmartRack® remains your partner from start to finish of your work when it comes to organizing workstations and storing your laboratory accessories and glassware in a structured and safe manner at your workstation.

### Space saving – 80% space saving in the laboratory

**Don't have much space but still want to work in a structured way?** The SmartRack® offers an effective solution for everyday challenges in laboratory work – in various fields including chemistry, biology, biochemistry, the food industry, pharmacy and medicine. This eliminates the need for various holders, including those for pipettes or round-bottom flasks (e.g. cork rings, three-finger clamps), or a waste bin.

### Safety – significantly improved safety when working in the laboratory

**Did you know that each accident at work in the chemical industry costs an average of €25,000?** In 2018 alone, more than 15,000 accidents at work were reported in this industry. The resulting costs and lost working hours are huge and could have been avoided through better safety at work and better working conditions. The SmartRack® helps achieve these improved conditions by offering the highest level of safety through its stable metal frame and the integrated anti-tip protection for the entire SmartRack®. The modules are securely clicked into the slot rails of the SmartRack® by a click mechanism, so that all samples and devices are securely fixed.

### Efficiency – improved efficiency in research and analysis

**Are you still searching or are you already researching?** Laboratory staff spends around 10 minutes a day searching because disorganization makes their work more difficult. This adds up to significant lost working time over a period of months and results in unwanted costs and frustration. Optimal working conditions pave the way for focused and routine work and also help prevent mistakes. Employees rely on optimal conditions in the workplace to remain physically and mentally active, creative and innovative in the long term.

### Modularity and adaptability – your partner in the lab, the SmartRack®

**Whether you need general basic equipment for your laboratory or special modular set-ups for analytics – the SmartRack® is your number one choice.** The number and position of the SmartRack® modules can always be adapted to your individual needs. Custom made fixtures according to customer requirements are also possible.

#### Problem

- Shortage of space
- Time pressure

#### Consequence

- Disorganization
- Accidents
- Sample mix-ups
- Sample loss
- Stress

#### Solution

The **SmartRack®** - the organization system for every laboratory

#### Result

- Improved safety
- Increased efficiency
- Organization
- Clarity
- Flexibility

## BETTER BASICS LABORBEDARF

### Your competent partner for laboratory equipment

Do you need a flexible solution for organizing a wide variety of laboratory equipment and samples?

Do you need a secure holder for microliter syringes, a storage option for screw top bottles or a way to temporarily store samples and all that in a tight space?

Whatever your heart desires – Better Basics is a specialist in laboratory organization and will supply you with the right product for you – regardless of whether you are looking for a basic equipment module or have very specific laboratory needs. The Better Basics product portfolio is modular and can easily be expanded.

## CUSTOMIZING

### Your wish is our command, Your satisfaction is our objective

Do you have very specific laboratory organization requirements?

If you haven't yet found the right option for your laboratory among our products and modules, we can quickly and cost-effectively design and manufacture your custom products or your individual solutions for you thanks to our in-house design team and 3D manufacturing.

From your request to your prototype, we only need a few days.

### Example of a module: SmartRack® holder for laboratory screw top bottles

### We make the lab setup easy for you

We provide you with individual components. We work with our partners to provide equipment for complete laboratory set-ups. From basic equipment up to superstructures for special applications, our SmartRack® can be expanded and combined to suit your needs. Transportable and scalable, it remains your trusty partner from start to finish of your work when it comes to structuring and implementing complex laboratory set-ups in a simple, clear and safe way.

### **Our request to you**

A product like our SmartRack® is only as good as its users. With our roots in the Leibniz Institute for Polymer Research Dresden, our company Better Basics Laborbedarf stands for the tradition of "Made in Germany" quality. We feel in multiple aspects committed to this quality label for German companies, which stands for high innovative strength. Even beyond our product catalog, the same applies for us at Better Basics: Just contact us if you have ideas for extensions or improvements or if you notice something in your daily laboratory routine that we should optimize right away.

We want to create the best possible working environment for you in the laboratory and we are grateful for any comments and inspiration. We can jointly shape the future of laboratory work by cooperating with scientists and researchers. Just like you, we're always looking for a way to make our world a little better every day.
