BETTER BASICS LABORBEDARF

BESPOKE LABORATORY ORGANISATION –

SMART BASICS FOR LABORATORIES

We make laboratories safe and efficient

At Better Basics Laborbedarf, we develop, manufacture and distribute smart basic equipment for laboratories. We use 3D printing to manufacture innovative products, such as the SmartRack®, a modular organization system for laboratory workstations that creates order and thus improves work safety and increases user efficiency.

This means we can provide you with individual components. Starting with basic equipment up to superstructures for special applications, our products and modules can be expanded and combined in line with your requirements. We work with our partners to provide you with the equipment for a safe and efficient laboratory

ORGANIZATION

SPACE-SAVING

EFFICIENCY

SAFETY

www.Better-Basics-Laborbedarf.de

Problem

- Shortage of space
- Time pressure

Consequence

- Disorganization
- Accidents
- Sample mix-ups
- Sample loss
- Stress

Solution

The **SmartRack®** -
the organization system
for every laboratory

Result

- Improved safety
- Increased efficiency
- Organization
- Clarity
- Flexibility

We help you

achieve your objectives in research, analysis and laboratory work through laboratory organization

Are you always working on new challenges and you are looking for a laboratory organization solution

- that creates order
- saves space
- improves safety
- increases efficiency
- and is modular and
- can be upgraded as required?

But even with all these objectives, you don't want to lose sight of profitability and cost efficiency?

Better Basics offers the world's only modular organization system for laboratory environments, where users from the fields of chemistry, biology, biochemistry, food chemistry, pharmacy and medicine alike can work optimally.

Better Basics wants to help you work safely and sustainably at all levels to meet your objectives in research, science and laboratory work with the highest quality and to international standards.

Customizing

*your wish is our command,
your satisfaction is our objective*

Do you have very specific laboratory organization requirements?

If you haven't yet found the right option for your laboratory among our products and modules, we can quickly and cost-effectively design and manufacture your custom products or your individual solutions for you thanks to our in-house design team and 3D manufacturing.

From your request to your prototype, we only need a few days.

The Better Basics brand stands for...

- Innovative strength based on cutting-edge research – a broad and continuously growing range of products that is tested and expanded over the long term
- "Made in Germany" quality – manufacturing 100% in Germany
- Premium quality at attractive prices – because our products practically pay for themselves
- Flexibility in response to customer requests – the ability to respond quickly to individual requirements
- Sustainability – using 3D printing technology with 100% certified green power

Tradition and sophistication

under the "Made in Germany" label

With our roots in the Leibniz Institute for Polymer Research Dresden, Better Basics Laborbedarf follows the "Made in Germany" tradition of quality.

We feel in multiple aspects committed to this quality label for German companies, which stands for high innovative strength. We understand that high innovative strength is a key element of entrepreneurial success and in this spirit support our users and partners to stay competitive and successful.

In addition, we rely on active dialogue between our development and manufacturing teams as well as exchanges with our customers. That is why we have experts for all laboratory processes available to you on a long-term basis as contact persons for queries.

At Better Basics, providing laboratory equipment means giving you the best possible advice and support at all times, so that you can find and get the best products for your laboratory. Reliable delivery, quick responses to questions and bespoke service are cornerstones of Better Basics.
